

## Partnering Opportunities

These are some of the relationships we will consider:

**Vendor sponsorship,** including donations of GPS, sensors, vehicles, components, team clothing, etc.

**Media and documentary film:** greater access to our development and race efforts.

**Promo/Advertising:** your corporate logo on our vehicle.

**Investors** who believe in a future with autonomous vehicles.

## Our Vision

We endorse the concept of competition fostering innovation. Beyond the prize of the Grand Challenge Race and the resultant military applications, we foresee groundbreaking commercial and civilian applications that will enable entirely new, multi-billion dollar markets and opportunities.
